

Microphone

Warning Sticker

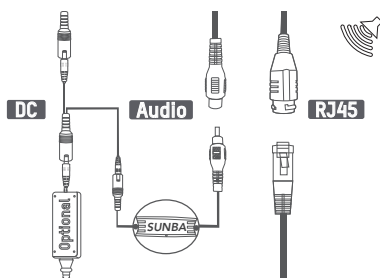

1 to 2 Shape DC Splitter

*The microphone must be powered by DC12V. All Sunba IP cameras have solutions to power the mic while not add extra cables. Please check your IPC user guide to see if your camera has corresponding solutions as well.

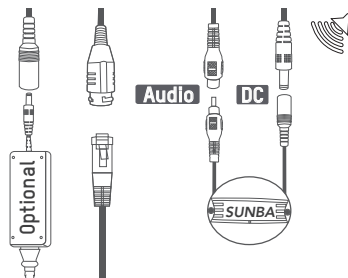

*The microphone has both audio female and male ports because some IP cameras use audio female port while some others use audio male ports. In this case, apply the matching port correspondingly for your IP camera.

*How do I use the 1 to 2 Y-Shape DC Splitter: this is the splitter for powering the microphone without the need of running an additional power cable for non-PoE IP cameras (see installation diagram below).

Installation Diagram (depends on device)

Non-PoE Camera

Sunba 405/601 Series PoE Camera

Compliance: why a warning sticker is helpful?

United States Codes, Title 18, Section 2510 states: Oral communication means any "oral communication" uttered by a person exhibiting an expectation that such communication is not subject to interception under circumstances justifying such expectation. By definition of the code section, a person cannot have an expectation of privacy, nor can he or she expect that communication will not be intercepted, if there are public signs posted, indicating that the communication is being monitored. This means that any overhearing or recording of a conversation is illegal unless both parties are aware that it is being done. Therefore, it is suggested that, at the time of installation (or purchase) of the equipment, a warning sticker must be displayed in plain view per Federal law.

Disclaimer: As with any legal matter, we are not attorneys and are not offering legal advice. Laws may vary by states so it is your responsibility to become fully aware of the local laws in this regard.

SUNBA®

Sunba Outdoor CCTV Microphone

For IP Network Camera

Work Temperature : -40°C~85°C
